The MAILING DATE of this communication appears on the cover sheet with the correspondence address Peri df r Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status					
1) Responsive to communication(s) filed on 16 F	ebruary 2000 and 02 Novembe	<u>er 2000</u> .			
2a)☐ This action is <b>FINAL</b> . 2b)⊠ Thi	s action is non-final.				
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.  Disposition of Claims					
4) Claim(s) 1-20 is/are pending in the application.					
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-20</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or	election requirement.				
Application Papers					
9)⊠ The specification is objected to by the Examiner	•				
10)⊠ The drawing(s) filed on <u>16 February 2000</u> is/are: a)⊠ accepted or b)⊡ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
11) ☐ The proposed drawing correction filed on is: a) ☐ approved b) ☐ disapproved by the Examiner.					
If approved, corrected drawings are required in reply to this Office action.					
12)☐ The oath or declaration is objected to by the Examiner.					
Pri rity under 35 U.S.C. §§ 119 and 120					
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).					
a) ☐ All b) ☐ Some * c) ☐ None of:					
1. Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No.					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).  * See the attached detailed Office action for a list of the certified copies not received.					
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).					
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## **DETAILED ACTION**

## Specification

- 1. Claims 1 and 11 are objected to because of the following informalities: miss-spelling the term "multiplexor". This term should be "multiplexer". Appropriate correction is required.
- 2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanihira et al. (U.S. 5,553,010).

Re claims 1, 7, 9, 11, 17, and 19, Tanihira et al. discloses a logic circuit in Figure 6 for shifting the input data (Din). The logic circuit comprises a plurality of logic gates (Logic I 110-113 & 15, Logic II 120-123 & 16, Logic III 130-133 & 17, Logic IV 140-143 & 18) for receiving data input (Din0-Din3) and control signals (S0-S3 and 19) and a plurality of shared data lines (Din bus) connecting logic gates. The shared data lines provide a portion of the data inputs for each of the logic gates. In addition, Tanihira et al. discloses the logic gate in Figure 6 shift data received at the data inputs (Din) based

Application/Control Number: 09/505,382

Art Unit: 2124

upon the control signals (S0-S3) and connections of the shared data. Tanihira et al. discloses the first and second control signals are enable to shift either left/right (output data).

Re claims 2 and 12, Tanihira et al. discloses the above logic circuit in Figure 26 wherein each of the logic gates includes first (34 and 35) and second (20) stages shift operation.

Re claims 3 and 13, Tanihira et al. discloses the above logic circuit in Figure 26 wherein each of the logic gates includes two set of control signal (first and second specification signals), one for first stage and one for second stage.

Re claims 4 and 14, Tanihira et al. discloses the above logic circuit comprising another plurality of shared data lines (output 344 and 354) for providing data inputs to the second stage shifting operation.

Re claims 5 and 15, Tanihira et al. discloses the above logic circuit in Figure 6 wherein the plurality of shared data lines connect adjacent logic gates (Din bus) among the plurality of logic gates.

Re claims 6 and 16, Tanihira et al. discloses the above logic circuit in Figure 6 wherein each of the logic gates receives one of the data inputs (Din) as a primary data line.

Re claims 10 and 20, Tanihira et al. discloses the above logic circuit in Figure 6 wherein each of the shared data lines connect one of the logic gates with a plurality of the logic gates.

Application/Control Number: 09/505,382 Page 4

## Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 8 and 18 are rejected under 35 U.S.C. 103(a) as being obvious over Tanihira et al. (U.S. 5,553,010) in view of Wong et al. (U.S. 5,822,231).

Re claims 8 and 18, Tanihira et al. discloses the above logic circuit in Figure 6 wherein each of the logic gates control by the control signals (S0-S3). Tanihira et al. does not disclose the logic gates including a plurality of transistors. However, Wong et al. discloses in Figure 2 the logic gates compose of a plurality of transistors. Therefore, it would have been obvious to a person having ordinary skill in the art to include a plurality of transistors in the logic gates for controlling the logic signal.

#### Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
  - a. U.S. Patent No. 5,526,296 to Nakahara et al. discloses a bit field operating system and method with two-barrel shifters for high-speed operations.
  - b. U.S. Patent No. 4,636,976 to Takia discloses a bit shifting apparatus.
  - c. U.S. Patent No. 3,596,251 to John discloses a logical shifting device and method of shifting.
